

SPECIFICATION DATA

TRAMCO 960 Inside Lift Station

TRAMCO's **960** Inside Lift Stations are engineered and precision built for years of dependable service. Quality materials and construction, allow for continuous operation.

Pump

Heavy duty 2" sewage ejector, capable of pumping over 100 gallons per minute. Designed for over **30 Years** of maintenance free operation.

Motor

1/2 H.P., 115V, totally enclosed fan cooled, double capacitor start with automatic resetting overload protection.

Basin

Hot Dipped Galvanized Steel fitted to receive drain tile and a filter plate for a seepage bed.

Check Valve

Soft acting, Bronze seat readily accessible under a removable cover. The check valves shall allow flow by gravity when the pump is temporarily inoperable due to power failure.

Cleanout

Large cleanout opening with a gasketed cover.

Liquid Level Control

Nema-1 float switch with Stainless Steel float ball and float rod.
